WORK EXPERIENCE

Zaaksysteem.nl
Javascript Engineer

Nov 2019 - Present

Digitalizing way of working within gementees

- Added Typescript support to in-house built design system library
- Modernized legacy AngularJS application to React codebase with micro frontend architecture
- Tweaked pipelines to cut deployment times from 36 minutes to 12 minutes
- Applied strict CSP headers to improve security of the application

Software Mind
Software Engeneer II

Nov 2018 - Nov 2019

Awesome polish software house

- Migrated jQuery based modules to React codebase
- Optimized webpack configuration slashing total build time from 50 minutes to 6 minutes
- Organized 3 technical presentations about tools in javascript ecosystem
- Collaborated within team of 9 frontend developers from multiple remote locations in a scrum setting
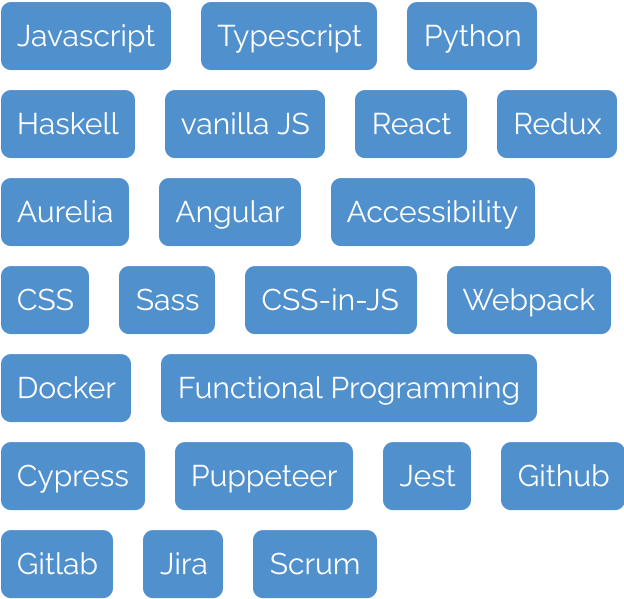

CISS
Web Developer

Sep 2017 - Nov 2018

Local business providing web applications for European clients.

- Engineered full front end for CRM web application
- Connecting to the restful API conforming to JSON:API specification
- Onboarded other web developer into the team
- Collaborated with web designer and backed developer

TECHNOLOGY FOCUS

Javascript Typescript Python
Haskell vanilla JS React Redux
Aurelia Angular Accessibility
CSS Sass CSS-in-JS Webpack
Docker Functional Programming
Cypress Puppeteer Jest Github
Gitlab Jira Scrum

WHAT I BRING TO THE TABLE

- Working knowledge of configuring and integrating modern front-end development tools (Webpack, NPM, ESLint, Babel etc.)
- Insight into utilisation, strengths and weaknesses of different Javascript frameworks
- Understanding that good communication is the key in successful development process
- Proficiency in translating business needs into technical requirements
- Enthusiastim for functional programming paradigm
- Competence in producing high quality code
- Can-do attitude
